## PROFILE

I am a 22-year-old Software Developer, diligent and reliable, with practical experience in **full-stack** development and proficiency in modern **web technologies**. In addition to my strong willingness to learn, my core strengths include **active listening skills** and total dedication to the projects I undertake. I am fluent in **Italian, English, and Romanian**, and currently learning **German**.

## EDUCATION

### USI (UNIVERSITÀ DELLA SVIZZERA ITALIANA), LUGANO, CH

Sep 2022 - Jun 2025

#### BACHELOR IN INFORMATICS

- Thesis: "In-depth analysis of the WebRTC protocol". • In-depth analysis of the WebRTC protocol, the technology currently underlying almost all modern communication applications. • Practical implementation to demonstrate API capabilities: a simulation of an audio/video app (Skype style) and a real-time *collaborative drawing* application.

### I.I.S. G. VALLAURI, FOSSANO, IT

Sep 2017 - Jun 2022

TECHNICAL DIPLOMA - IT AND TELECOMMUNICATIONS

## EXPERIENCE

### TEQ SA, LUGANO, CH

Jun 2025 - Present

#### SOFTWARE DEVELOPER

- Software management for control panels on pharmaceutical machines (autoclaves). The panels are **Linux**-based devices with web apps in **Java** and **TypeScript**. • Development of **Python** tools to automate code deployment directly to machinery for real-world validation. • Management of the full project lifecycle: task planning, development management on Git (GitLab), build supervision, and release coordination. • Direct communication with clients to define and prioritize new features and handle bug fixes.

### WEBCHIP, FOSSANO, IT (REMOTE)

Dec 2021 - May 2024

#### WEB DEVELOPER (FREELANCE)

- Launched and managed a freelance web development initiative, creating custom websites using **HTML, CSS, and JavaScript**. • Main point of contact for business owners, translating commercial goals into functional digital designs. • Full-service support, including social media management and ongoing site maintenance. • Project archive available at: <https://edoardo-aba.github.io/websites/>

### OIKOS ENGINEERING SRL, ALBA, IT

Jun 2021 - Jan 2023

#### SOFTWARE DEVELOPER (FREELANCE)

- Modernization of public services by maintaining **Angular** portals to streamline bureaucratic flows (SUE, SUAP) for Italian municipalities. • Hands-on engineering role in building a backend in **Vanilla JavaScript** for a citizen issue-reporting tool.

### ALMEC S.P.A, DOGLIANI, IT

Mar 2022 - Jun 2022

#### FULL-STACK DEVELOPER (INTERNSHIP)

- Creation of a machine monitoring solution integrating modems for real-time tracking. • Design of a user-friendly dashboard in **React.js** for data visualization, stored on **MongoDB**. • Implementation of backend security (login logic and JWT authentication) in a **Node.js** and **Express.js** environment.

## PROJECTS

### APPRAISAL MANAGEMENT SYSTEM (TYPESCRIPT, NODE.JS, MONGODB, CORDOVA)

Jun 2023 - Oct 2023

- Developed an **Android app** for real-time uploading of inspection data, including photos, location, and descriptions, to a remote server. • Integrated geolocation and camera functionality to capture exact inspection locations and attach images with comments. • Created a server in **Node.js** and configured a database with **MongoDB Atlas** to support scalable and accessible data storage. • Built an **administrative dashboard** for visualizing inspections on a map, managing users, and accessing inspection details.

## SKILLS

---

**LANGUAGES** Java | TypeScript | Python | HTML | CSS  
**FRAMEWORKS** React | Angular  
**BACKEND** Node | SpringBoot | Flask  
**DEVOPS** GitLab | Docker | Kubernetes | CI/CD  
**DATABASES** MongoDB | PostgreSQL | Redis  
**TOOLS** Linux | Unix Shell | Bash

## HOBBIES & INTERESTS

---

I am dedicated to creative writing, drafting short stories focused on narrative themes that fascinate me. In parallel, I cultivate a strong interest in the world of finance and investing.
